STREET CHILDREN CARE - 3rd pillar:

HAYAG provides basic essentials for street children

Every Sunday, up to 180 street children are invited to eat in House HAYAG. For the hungry children to really be able to eat their fill, our HAYAG girls prepare and serve a nutritious meal – and tenderly feed the smallest children. Within the scope of STREET CHILDREN CARE, we also introduce the children to the basics of hygiene: washing, brushing teeth and eating with spoon and fork. The children get their first pair of shoes (flip-flops!), clean clothes as well as the necessary medical care. Additionally, we feed further children directly out on the streets - with up to 1,000 warm meals a month. Is there anything better than being able to satisfy the hunger of the poorest, malnourished children?

PLEASE SUPPORT HAYAG, TOO!

How you can help? With your donation. We are happy about your one-time donation as well as about your regular support as a HAYAG member. Your membership allows us to effectively plan the finances and to guarantee a steady help for the children. The HAYAG children are certainly more grateful than words can express. A special fact/our guarantee: 100 % of your help will go directly to the project. We all do volunteer work. The association's board members bear all costs incurred for administration, promotion, etc.

"FOR A BETTER WORLD" –
EDUCATION AGAINST POVERTY

Three pillars of support that have a lasting
impact on the lives of the poorest children.

Help to make a change. Every day counts!

HAYAG

THE CHILD CARE PROJECT HAYAG

GERMANY: "By coincidence" we are very fortunate to be born here? PHILIPPINES: a country (almost) without any chances. Starving (to death) or selling your own body? Unfortunately, girls from the shanty towns of poor nations are often confronted with this decision.

Through "education against poverty", the HAYAG care project offers a future (in dignity) to the children in the Philippines. HAYAG is based on these three pillars of support:

- RESIDENTIAL CARE
- EDUCATION CARE
- STREET CHILDREN CARE

House HAYAG in the middle of the slum of Cebu City forms the center, the heart of the project.

The "HAYAG children" who we care for within the scope of our three support pillars come from extremely impoverished, destitute conditions. HAYAG gives them the opportunity to permanently liberate themselves from poverty and their predetermined hopeless future prospects – or to simply be able to eat sufficiently for once.

HAYAG MEANS "LIGHT"

Light that we would like to give to the poorest children. House HAYAG has existed since 2004. We provide the right framework to this project with the HAYAG International e. V. aid association to help in a targeted and substantiated way and "create a better world". Did we not get our wealth here at the expense of poor countries such as the Philippines?

as of: August 2016

RESIDENTIAL CARE - 1st pillar:

Holistic care for young girls in House HAYAG

The RESIDENTIAL CARE project is the basis and precondition for the other two pillars. For a certain period of time, we thereby accommodate girls in need aged 14 and above in our project house.

Our "HAYAG girls" come from remote areas and are mostly orphans or half-orphans. We make it possible for them to go to school, to do an apprenticeship or to study. For the girls, "the RESIDENTIAL", to be able to contribute to their own living, they run a small catering service. A HAYAG girl can live in the house until she is in a position to lead an autonomous and independent life – until a future in dignity lies ahead. Up to 40 girls could be accommodated in House HAYAG. Could? Unfortunately, we have reached our financial limits with the 35 girls now living in the house.

EDUCATION CARE - 2nd pillar:

HAYAG enables children to go to school – the pupils live with their families

With this project, we arrange and support school attendance for currently 45 children aged 6 and above: The pupils live with their families in town. However, their parents are too poor to pay for the education of their children. Through the EDUCATION CARE pillar we finance all the necessary school materials, the obligatory school uniform as well as school fees and travel expenses. And more: During the school term, the HAYAG girls "tutor" the children every Saturday in the project house. And they even coach them daily during the school vacations.
